Bellis Expansion Bellows

Bellis uses a variety of materials for construction of Bellows ranging from Low Temp Porous Cloth Joints, Chemical & Acid Resistant units, to Very High Temp Sealed applications using specialized Metals and Insulation materials. All applications require specific materials for maximum performance.

At Bellis we match the Materials to the Process

Above - Special Internal Fabrics for Sealing and increased Lateral Movement. Left - Special S/Steel Alloy for high Temperatures and Flue Gas Resistance.

These are examples used in: Smelters, Power Stations, Refineries, Chemical Plants, Marine Industry, Sugar Mills, Mining Industry.
